Excerpt from A Laboratory Guide in Elementary Zoology This is a marine form found abundantly along the New England shores fastened to seaweed, submerged wood, etc., just below low tide mark. Note the difference in size of the specimens submitted for. Examination. Study them with the hand lens. Note the cylindrical sponge body. Do the two ends differ? Note the opening at one end, the osculum. Press the sponge lightly. Notice the flexibility of the wall. Note the buds on the larger specimens. Do the buds have oscula? Carefully cut a sponge from the osculum to the base. Lay the cut specimen open in water with the cloacal surface up. Does this chamber communi cate with that of the buds? About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

Excerpt from A Laboratory Guide in Elementary Bacteriology The following pages constitute, substantially, the material which has been furnished the stu dents in Bacteriology at the University of Wisconsin, in mimeograph form, for several years. They contain directions for the performance of certain fundamental exercises in Bacteriology. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
