View Answer. Anatomy can be best described as: (a) The study of how the body and it's parts work and function together. (b) The study of applying exercise principles to body functions and how each...

Biology Questions and Answers | Study.com

Answer Water moves through a semipermeable membrane in osmosis because there is a concentration gradient across the membrane of solute and solvent. The solute cannot effectively move to balance the concentration on both sides of the membrane, so water moves to achieve this balance. OpenStax Concepts of Biology Instructor Answer Guide20.

Answer OpenStax Concepts of Biology Instructor Answer ...

Biological concepts are concepts that have to do with biology which is the study of life. An example of this is the study of human cells.
