## AP Biology

In a unicellular organism, cell division creates an entire new organism, but in multicellular organism, it creates offspring.

Additionally in multicellular organisms.

Cell division enables sexually producing organisms to develop from a single cell (zygote)

spread and intensify  
across the planet,  
conservation biologists  
have to analyze dynamics  
at large spatial and  
temporal scales.

Ecological and  
evolutionary processes  
are then closely  
intertwined. In particular,  
evolutionary responses to  
anthropogenic  
environmental change  
can be so fast and
