CIVIL ENGINEER | definition in the ... - Cambridge Dictionary

A Dictionary of Construction, Surveying, and Civil Engineering (Oxford Quick Reference) [Gorse, Christopher, Johnston, David, Pritchard, Martin] on Amazon.com. *FREE* shipping on qualifying offers. A Dictionary of Construction, Surveying, and Civil Engineering (Oxford Quick Reference)

This reference manual provides a list of approximately 300 technical terms and phrases common to environmental and civil engineering which non-English speakers often find difficult to understand in English. The manual provides the terms and phrases in alphabetical order, followed by a concise English definition, then a translation of the term in Arabic and, finally, an interpretation or translation of the term or phrase in Arabic. Following the Arabic translation section, the columns are reversed and reordered alphabetically in Arabic with the English term and translation following the Arabic term or phrase. The objective is to provide a technical term reference manual for non-English speaking students and engineers who are familiar with Arabic, but uncomfortable with English and to provide a similar reference for English speaking students and engineers working in an area of the world where the Arabic language predominates.

Since 1997, this translator's guide has been the worldwide leader in its field and has elicited high praise from some of the world's best translators. It has been fully updated in the 2006 edition.

The current, thoroughly revised and updated edition of this approved title, evaluates information sources in the field of technology. It provides the reader not only with information of primary and secondary sources, but also analyses the details of information from all the important technical fields, including environmental technology, biotechnology, aviation and defence, nanotechnology, industrial design, material science, security and health care in the workplace, as well as aspects of the fields of chemistry, electro technology and mechanical engineering. The sources of information presented also contain publications available in printed and electronic form, such as books, journals, electronic magazines, technical reports, dissertations, scientific reports, articles from conferences, meetings and symposiums, patents and patent information, technical standards, products, electronic full text services, abstract and indexing services, bibliographies, reviews, internet sources, reference works and publications of professional associations. Information Sources in Engineering is aimed at librarians and information scientists in technical fields as well as non-professional information specialists, who have to provide information about technical issues. Furthermore, this title is of great value to students and people with technical professions.

A practical guide to translation as a profession, this book provides everything translators need to know, from digital equipment to translation techniques, dictionaries in over seventy languages, and sources of translation work. It is the premier sourcebook for all linguists, used by both beginners and veterans, and its predecessor, *The Translator's Handbook*, has been praised by some of the world's leading translators, such as Gregory Rabassa and Marina Orellana."

The papers collected in this volume are a selection of papers presented at a conference on Language and Translation (Irbid, Jordan, 1992). In their revised form, they offer comparisons between Western and Arabic language usage and transfer. The articles bring together linguistic and cultural aspects in translation in a functional discourse framework set out in Part One: Theory, Culture, Ideology. Part Two addresses aspects for comparisons among translations and their cultural contexts (equivalence, stylistics and paragraphing). Part Three features Arabic-English language contact, specifically in technical writing, the media and academia. Part Four deals with problems in lexicography and grammar: terminology, verb-particle combinations and semantic diversity of radical-doubling forms and includes a proposal for a new approach to English/Arabic dictionaries. Part Five turns to issues of interest to language teachers with practical proposals and demonstrations. Part Six deals with geopolitical factors linking the West and Middle East, focusing on equality in communication and exchange of information.

Much of the insight in the field of Arabic linguistics has for a long time remained unknown to linguists outside the field. Regrettably, Arabic data rarely feature in the formulation of theories and analytical tools in modern linguistics. This situation is unfavourable to both sides. The Arabist, once an outsider, has almost become a non-member of the mainstream linguistics community. Consequently, linguistics itself has been deprived of a wealth of data from one of the world's major languages. However, it is reassuring to witness advances being made to integrate into mainstream linguistics the visions and debates of specialists in Arabic. Building on this fruitful endeavour, this book presents thought-provoking, new articles, especially written for this collection by leading scholars from both sides. The authors discuss topics in historical, social and spatial dialectology focusing on Arabic data investigated within modern analytical frameworks.

1970- issued in 2 vols.: v. 1, General reference, social sciences, history, economics, business; v. 2, Fine arts, humanities, science and engineering.
