Arduino Reset. You can reset your

Arduino board, i.e., start your

program from the beginning. You

can reset the UNO board in two

ways. First, by using the reset

button (17) on the board. Second,

you can connect an external reset

button to the Arduino pin labelled

RESET (5). Pins (3.3, 5, GND, Vin)

3.3V (6) – Supply 3.3 output volt

Most beginners feel uncomfortable about Arduino programming language while getting started. Arduino language is based on C. Anyone having know-how of basic programming in C, can easily start programming in Arduino. Every Arduino program must have two functions a setup() function – which runs only once and a loop() function which runs forever. Think of functions as sub-programs responsible for handling small tasks in a large program.
