Biodynamic agriculture is a form of alternative agriculture very similar to organic farming, but it includes various esoteric concepts drawn from the ideas of Rudolf Steiner (1861-1925). [1] [2] Initially developed in 1924, it was the first of the organic agriculture movements. [3]

Biodynamic agriculture - Wikipedia

Biodynamic farming is the oldest 'green' farming movement, and forerunner of organics. All biodynamic farmers and growers practice organic methods of cultivation, are against genetic modification (GM), and share its ideals, but there are important differences. Biodynamics has metaphysical and spiritual roots that organics does not.

Home | Biodynamic Association

Biodynamics is a holistic, ecological, and ethical approach to farming, gardening, food, and nutrition. Biodynamics is rooted in the work of philosopher and scientist Dr. Rudolf Steiner, whose 1924 lectures to farmers opened a new way to integrate scientific understanding with a recognition of spirit in nature.

What Is Biodynamics? | Biodynamic Association

The Biodynamic Federation - Demeter International is launching a new film campaign which articulates the true values of biodynamic farming. Human development and care for nature are at the heart of biodynamic agriculture, illustrating both the responsibility and the courage that are needed every day in agriculture, qualities that are lacking in our current political world.

Biodynamic farming: healing the world through agriculture ...

Biodynamic methods are considered a form of organic farming, but biodynamic farming expands on organic's sustainable and natural approach with a holistic, farm-as-an-organism school of thought. The concept is as the word itself would suggest: a combination of biological and dynamic practices, "bio" meaning life and "dyn" meaning force.

How Biodynamic Agriculture Works | HowStuffWorks

Biodynamic farming is a method which is similar to organic farming, but it involves some kind of natural forces which increase the vitality of the soil. In this method, the farmers will make use of all the living organisms present in nature to get a good production of the crops or any other products being produced.
