This volume integrates the theme of Spain in Italy into a broad synthesis of late Renaissance and early modern Italy by restoring the contingency of events, local and imperial decision-making, and the distinct voices of individual Spaniards and Italians.

In the age of the Grand Tour, foreigners flocked to Italy to gawk at its ruins and paintings, enjoy its salons and cafés, attend the opera, and revel in their own discovery of its past. But they also marveled at the people they saw, both male and female. In an era in which castrati were "rock

Classic," men served women as cicisbei, and dandified Englishmen became macaroni, Italy was perceived to be a place where men became women. The great publicity surrounding female poets, journalists, artists, anatomists, and scientists, and the visible roles for such women in salons, academies, and universities in many Italian cities also made visitors wonder whether women had become men. Such images, of course, were stereotypes, but they were nonetheless grounded in a reality that was unique to the Italian peninsula. This volume illuminates the social and cultural

Landscape of eighteenth-century Italy by exploring how questions of gender in music, art, literature, science, and medicine shaped perceptions of Italy in the age of the Grand Tour.

This 2002 book attempts to overcome the traditional historiographical approach to the role of the early modern papacy by focusing on the actual mechanisms of power in the papal court. The period covered extends from the Renaissance to the aftermath of the peace of Westphalia in 1648 - after which the papacy was reduced to a mainly spiritual role. Based on research in Italian

and other European archives, the book concentrates on the factions at the Roman court and in the college of cardinals. The sacred college came under great international pressure during the election of a new pope, and consequently such figures as foreign ambassadors and foreign cardinals are examined, as well as political liaisons and social contacts at court. Finally, the book includes an analysis of the ambiguous nature of Roman ceremonial, which was both religious and secular: a reflection of the power struggle both in Rome and in Europe.

Travelers' accounts, on more learned humanist and antiquarian writings, and, most importantly, on the art of the period, Brown explores Venice's evolving sense of the past. She begins with the late middle ages, when Venice sought to invent a dignified civic past by means of object, image, and text. Moving on to the fourteenth and fifteenth centuries, she discusses the collecting and recording of antiquities and the incorporation of Roman forms.

Challenges the old view that Italy was in general decline, instead he shows it to have been a time of sharp contrasts and shifts in fortune. He starts with a balanced and critical analysis of political developments (placing the Italian states in their wider European context) before assessing the state of the economy. He then looks in depth at society, religion, and culture and science and in particular reassesses the influence of the Counter Reformation on Italian life. His book ends with an engrossing account of the life and work of Galileo as well as an

Overview of the important and often neglected contributions made by other scientists in the later part of the century. This rich and balanced volume is an ideal introduction to early modern Italy, and provides a critical reevaluation of a much misunderstood period in the country's history.

Compiled from the celebrated archive accumulated by Sir Brinsley Ford, this dictionary identifies over six thousand British and Irish travellers who toured in Italy in the 18th century.
