Helmut Sigel, Astrid Sigel and Roland K.O. Sigel, in close cooperation with John Wiley & Sons, launch a new Series "Metal Ions in Life Sciences". The philosophy of the Series is based on the one successfully applied to a previous series published by another publisher, but the move from "biological systems" to "life sciences" will open the aims and scope and allow for the publication of books touching on the interface between chemistry, biology, pharmacology, biochemistry and medicine. Volume 2 focuses on the vibrant research area concerning nickel as well as its complexes and their role in Nature. With more than 2,800 references and over 130 illustrations, it is an essential resource for scientists working in the wide range from inorganic biochemistry all the way through to medicine. In 17 stimulating chapters, written by 47 internationally recognized experts, Nickel and Its Surprising Impact in Nature highlights critically the biogeochemistry of nickel, its role in the environment, in plants and cyanobacteria, as well as for the gastric pathogen *Helicobacter pylori*, for gene expression and carcinogenesis. In addition, it covers the complex-forming properties of nickel with amino acids, peptides, phosphates, nucleotides, and nucleic acids. The volume also provides sophisticated insights in the recent progress made in understanding the role of nickel in enzymes such as ureases, hydrogenases, superoxide dismutases, acireductone dioxygenases, acetyl-coenzyme A synthases, carbon monoxide dehydrogenases, methyl-coenzyme M reductases...and it reveals the chaperones of nickel metabolism.

Tells how to use and take care of ice cream machines, offers recipes for sorbets, ice creams, sherberts, and sauces, and gives tips on serving

The existence of a new family of chemotactic cytokines was realised in 1987 following the isolation and structural determination by several groups of a peptide consisting of 72 amino acids which was a potent activator of neutrophils and a chemotactic agent for lymphocytes. The first symposium of this series was held at the Royal College of Surgeons of England in December 1988, entitled Novel Neutrophil Stimulating Peptides, and brought together the majority of the laboratories which had published in this area, see Immunology Today 10: 146-147(1989). Since the first symposium there has been a dramatic increase in our knowledge of the biology of this family of structurally related peptides. The Second International Symposium on Chemotactic Cytokines was held at the Royal College of Surgeons of England in June 1990. The aim of this symposium was to provide both a forum for discussion and to determine whether this knowledge can be utilised in the design of novel therapeutic strategies for the treatment of inflammatory disorders. Although the majority of studies have been concerned with the regulation of these peptides at the molecular and cellular level, there is now evidence to suggest that specific members of this superfamily have a role in the pathogenesis of a number of diverse diseases including arthritis, psoriasis, atherosclerosis, wound repair, inflammatory lung diseases and glomerulonephritis.

For years experts have been telling Americans what to eat and what not to eat. Fat, they told us, was the enemy. Then it was salt, then sugar, then cholesterol... and on it goes. Americans listened and they lost -- but not their excess fat. What they lost was their health and waistlines. Americans are the fattest people on earth... and why? Mainly because of the food they eat. In this scientific and revolutionary book, based on Nobel Prize-winning research, medical visionary and former Massachusetts Institute of Technology researcher Dr. Barry Sears makes peak physical and mental performance, as well as permanent fat loss, simple for you to understand and achieve. With lists of good and bad carbohydrates, easy-to-follow food blocks and delicious recipes, The Zone provides all you need to begin your journey toward permanent fat loss, great health and all-round peak performance. In balance, your body will not only burn fat, but you'll fight heart disease, diabetes, PMS, chronic fatigue, depression and cancer, as well as alleviate the painful symptoms of diseases such as multiple sclerosis and HIV. This Zone state of exceptional health is well-known to champion athletes. Your own journey toward it can begin with your next meal. You will no longer think of food as merely an item of pleasure or a means to appease hunger. Food is your medicine and your ticket to that state of ultimate body balance, strength and great health: the Zone.

Gluten-free bakes can be every bit as delicious as traditional treats. With a little know-how from Honeybuns, you can enjoy gorgeous cakes, muffins, brownies, flapjacks, biscuits and puddings that contain no wheat or gluten. You'll find all your favourite teatime bakes, from Lemon drizzle cake and A very chocolatey cake to Baked apple muffins and Heathcliff brownies. There are lots of puddings too, including Baked lemon cheesecake, Chocolate and raspberry tartlets, Peach and raspberry roulade and Chocolate lime pie. Packed with practical tips and with a guide to ingredients, this book gives you all the inspiration and advice you need to make your baking gluten-free and gorgeous!

Over the last decade, a vegan diet has become a more mainstream choice; food allergies have been increasing at alarming rates; and celiac disease is on everyone's radar. When owner Jennifer Katzinger opened The Flying Apron Bakery in 2002, she wanted to accommodate more people, as well as use healthier ingredients so she eliminated gluten, dairy, egg, soy, and wheat. The mouthwatering result? Cakes and muffins with a tender crumb, cookies with a chewy bite, frosting that's light yet satisfyingly sweet, and pastry that flakes at the touch of a fork. In Flying Apron's Gluten-Free and Vegan Baking Book, Katzinger shares the delicious secrets of her sweet and savory recipes. Bake yummy pastries like Blueberry Cinnamon Scones and Lemon Poppy Seed muffins, or whip up a batch of Chocolate Chip Cookies, or Cardamom Spice Cupcakes. In more than 80 recipes, Katzinger offers satisfying treats, whether you're transitioning to a vegan or gluten-free diet, or simply wanting to indulge a sweet tooth using healthier ingredients.

A team of physicians and anthropologists compares the physical and social habits and environment of modern humankind with those of our prehistoric ancestors
