Check For Understanding Science World
Science asks questions about the natural world Science studies the natural world. This includes the components of the physical universe around us like atoms, plants, ecosystems, people, societies and galaxies, as well as the natural forces at work on those things. In contrast, science cannot study supernatural forces and explanations. For example, the idea that a supernatural afterlife exists is not a part of science since this afterlife operates outside the rules that govern the natural world.

It's about making strange, mysterious, and complicated things become things we understand. There's still lots more that we don't understand about our world and the whole universe, but that's where scientists come in. They are always asking questions and then finding the answers. So science isn't really strange at all!
