Civil Engineering Vs Construction Management

A civil engineer designs, maintains, plans, constructs, and operates infrastructures while taking care of environmental and public health, as well as refining existing buildings that have been neglected. Construction engineer on the other hand deals with the on-site management of infrastructures like airports, buildings, highways, railroads, bridges, utilities, and dams.

Key Differences Between Civil and Construction Engineering ...

In construction management, coursework in project management is a necessary requirement, as well as risk management, construction law, accounting/cost estimation, and financial management. Civil engineers may find their coursework heavy in classes such as sustainability, fluid mechanics, solid and hazardous waste materials, energy infrastructure, and others geared towards architecture, statistics, and the environment.

Read Book Civil Engineering Vs Construction Management

: I'm currently taking all the math a science courses at a community college, and by next spring I'll be applying to 4 year programs. I like the idea of construction management because there's a clear objective and the education requires hundreds of hours of on-site experience. Plus, I have a few years of management experience on top of my military experience.
