Commissioning of Offshore Installations

Offshore Energy can provide technical expertise to ensure project pre-commissioning requirements are managed in line with the principles of project management and industry best practice. This includes identification, preparation of specifications, management of sub-contracts, equipment planning and logistics, on-site monitoring and supervision, and as-built documentation.

Pre-commissioning-Offshore-Energy

The main objective of commissioning is to affect the safe and orderly handover of the unit from the constructor to the owner, guaranteeing its operability in terms of performance, reliability, safety and information traceability. Additionally, when executed in a planned and effective way, commissioning normally represents an essential factor for the fulfillment of schedule, costs, safety and quality requirements of the project.
