Antifreeze Leak | The Drive~~

Also in wintertime, water  
solidifies (freezes) and

## Access Free Coolant Pre Mixed Radiator Fluid

expands in volume which can crack your engine block, radiator and heater cores. This is the reason coolant is mixed with distilled water in a minimum 50/50 proportion. It lowers the freeze point of the coolant

# Access Free Coolant Pre Mixed Radiator Fluid

to protect it from freezing,  
even in the worst winter  
conditions.

~~The Different Colors of  
Coolant and their  
significance~~

Antifreeze makes use of

## Access Free Coolant Pre Mixed Radiator Fluid

ethylene glycol which is mixed with water in order to both help cool your engine and resist freezing. The most common ratios used are 70 percent water to 30 percent antifreeze for very warm parts of the country,

## Access Free Coolant Pre Mixed Radiator Fluid

but in colder areas a safer ratio - and the one most manufacturers recommend - is 50:50 antifreeze to water.
