Reconstructed from lecture notes of his students, these are the best records of the theories of Ferdinand De Saussure, the Swiss linguist whose theories of language are acknowledged as a primary source of the twentieth century movement known as Structuralism.

The Cours de linguistique generale, reconstructed from students' notes after Saussure's death in 1913, founded modern linguistic theory by breaking the study of language free from a merely historical and comparativist approach. Saussure's new method, now known as

Structuralism, has since been applied to such diverse areas as art, architecture, folklore, literary criticism, and philosophy.

The founder of modern linguistics, Ferdinand de Saussure inaugurated semiology, structuralism, and deconstruction and made possible the work of Jacques Derrida, Roland Barthes, Michel Foucault, and Jacques Lacan, thus enabling the development of French feminism, gender studies, New Historicism, and postcolonialism. Based on Saussure's lectures, *Course in General Linguistics* (1916) traces the rise and fall of the historical linguistics in which Saussure was trained, the synchronic or structural linguistics with which he replaced it, and the new look of diachronic linguistics that followed this change.

Most important, Saussure presents the principles of a new linguistic science that includes the invention of semiology, or the theory of the "signifier," the "signified," and the "sign" that they combine to produce. This is the first critical edition of Course in General Linguistics to appear in English and restores Wade Baskin's original translation of 1959, in which the terms "signifier" and "signified" are introduced into English in this precise way. Baskin renders Saussure clearly and accessibly, allowing readers to experience his shift of the theory of reference from mimesis to performance and his expansion of poetics to include all media, including the life sciences and environmentalism. An introduction situates Saussure within the history of ideas and describes the history of

scholarship that made Course in General Linguistics legendary. New endnotes enlarge Saussure's contexts to include literary criticism, cultural studies, and philosophy.

Ferdinand de Saussure is commonly regarded as one of the fathers of 20th Century Linguistics. His lectures, posthumously published as the Course in General Linguistics ushered in the structuralist mode which marked a key turning point in modern thought. Philosophers such as Jacques Derrida and Roland Barthes, psychoanalysts such as Jacques Lacan, the anthropologist Claude Levi-Strauss and linguists such as Noam Chomsky all found an important influence for their work in the pages of Saussure's text.

Published 100 years after Saussure's death, this new edition of Roy Harris's authoritative translation is now available in the Bloomsbury Revelations series with a substantial new introduction exploring Saussure's contemporary influence and importance.

The notes taken by Saussure's student Emile Constantin were not available to the editors of the published *Cours de linguistique générale* (1916), and came to light only after the second world war. They have never been published in their entirety. The third and last course of lectures, of which Constantin kept this very full record, is generally considered to represent a more advanced version of Saussure's teaching than the earlier two. It is clear

that Constantin's notebooks offer a text which differs in a number of significant respects from the Cours published by Saussure's original editors, and bring forward ideas which do not emerge in the 1916 publication. They constitute unique evidence concerning the final stages of Saussure's thinking about language. This edition of the notes is accompanied by an introduction and a full English translation of the text. There has been no attempt made by Komatsu and Harris, to turn the English into readable prose. Constantin's notes, even as revised by their author, retain the infelicities, repetitions, abruptness - occasionally incoherences - that betray the circumstances of their origin. The volume constitutes an important landmark in the history of modern

linguistics and provides essential documentation for all scholars and libraries specializing in the subject.

Ferdinand de Saussure's Course in General Linguistics is one of the most influential texts of the 20th-century – an astonishing feat for what is, at heart, a series of deeply technical lectures about the structure of human languages. What the Course's vast influence shows, fundamentally, is the power of good interpretative skills. The interpretative tasks of laying down and clarifying definitions are often vital to providing the logical framework for all kinds of critical thinking – whether it be solving problems in business, or esoteric academic research. At the time that Saussure gave his lectures, linguistics was a scattered and inconsistent field, without a unified

method or rigorous approach. He aimed to change that by setting down and clarifying definitions and distinctions that would provide a coherent methodological framework for the study of language. The terms laid down in the Course did exactly that – and they still make up the core of linguistic terminology a full century later. More than this, however, Saussure also highlighted the centrality of linguistic interpretation to understanding how we relate to the world, founding ‘semiotics’, or the study of signs – a field whose influence on academics across the humanities and social sciences is unparalleled.

This book draws on recent developments in research on Ferdinand de Saussure's general linguistics to challenge the structuralist

doctrine associated with the posthumous Course in General Linguistics (1916) and to develop a new philosophical interpretation of Saussure's conception of language based solely on authentic source materials. This project follows two new editorial paradigms: 1. a critical re-examination of the 1916 Course in light of the relevant sources and 2. a reclamation of the historically authentic materials from Saussure's Nachlass, some of them recently discovered. In Stawarska's book, this editorial paradigm shift serves to expose the difficulties surrounding the official Saussurean doctrine with its sets of oppositional pairings: the signifier and the signified; la langue and la parole; synchrony and diachrony. The book therefore puts pressure not only on the validity of the posthumous editorial

redaction of Saussure's course in general linguistics in the Course, but also on its structuralist and post-structuralist legacy within the works of Levi-Strauss, Lacan, and Derrida. Its constructive contribution consists in reclaiming the writings from Saussure's Nachlass in the service of a linguistic phenomenology, which intersects individual expression in the present with historically sedimented social conventions. Stawarska develops such a conception of language by engaging Saussure's own reflections with relevant writings by Hegel, Husserl, Roman Jakobson, and Merleau-Ponty. Finally, she enriches her philosophical critique with a detailed historical account of the material and institutional processes that led to the ghostwriting and legitimizing the Course as official
