An overview of the methods used for risk analysis in a variety of industrial sectors, with a particular focus on the consideration of human aspects, this book provides a definition of all the fundamental notions associated with risks and risk management, as well as clearly placing the discipline of risk analysis within the broader context of risk management processes. The author begins by presenting a certain number of basic concepts, followed by the general principle of risk analysis. He then moves on to examine the ISO31000 standard, which provides a specification for the implementation of a risk management approach. The ability to represent the information we use is crucial, so the representation of knowledge, covering both information concerning the risk occurrence mechanism and details of the system under scrutiny, is also considered. The different analysis methods are then presented, firstly for the identification of risks, then for their analysis in terms of cause and effect, and finally for the implementation of safety measures. Concrete examples are given throughout the book and the methodology and method can be applied to various fields (industry, health, organization, technical systems). Contents Part 1. General Concepts and Principles 1. Introduction 2. Basic Notions 3. Principles of Risk Analysis Methods 4. The Risk Management Process (ISO31000) Part 2. Knowledge Representation 5. Modeling Risk 6. Measuring the Importance of a Risk 7. Modelling of Systems for Risk Analysis Part 3. Risk Analysis Method 8. Preliminary Hazard Analysis 9. Failure Mode and Effects Analysis 10. Deviation Analysis Using the HAZOP Method 11. The Systemic and Organized Risk Analysis Method 12. Fault Tree Analysis 13. Event Tree and Bow-Tie Diagram Analysis 14. Human Reliability Analysis 15. Barrier Analysis and Layer of Protection Analysis Part 4. Appendices Appendix 1. Occupational Hazard Checklists Appendix 2. Causal Tree Analysis Appendix 3. A Few Reminders on the Theory of Probability Appendix 4. Useful Notions in Reliability Theory Appendix 5. Data Sources for Reliability Appendix 6. A Few Approaches for System Modelling Appendix 7. CaseStudy: Chemical Process Appendix 8. XRisk Software About the Authors Jean-Marie Flaus is Professor at Joseph Fourier University in Grenoble, France.

This document describes the vocational education and training system in Portugal, beginning in chapter 1 with the administrative, demographic, and economic background in which the training system exists. Chapter 2 provides a brief historical review of the development of the training systems; arrangements for initial training; and arrangements for continuing training, teacher training, and adult training. Chapter 3 indicates where responsibilities for administering the system are located, including the influence of the social partners, and presents information on the financing system. Chapter 4 provides an indication of present trends and developments, including how far the system has been, or would be, influenced by European Community considerations, such as the following: creation of the single European market, mutual recognition of qualifications, the intervention of the Structural Funds, and the Community's education and training programs. Appendices contain 23 references and the following: list of acronyms and abbreviated titles; major organizations involved in providing or regulating vocational training; and glossary. (YLB)

This paper discusses key findings of the Detailed Assessment of Implementation of the IOSCO (International Organization of Securities Commissions) Objectives and Principles of Securities Regulation on the United States. The United States has large, well-developed, and complex securities and derivatives markets. Postcrisis, the legal mandates of the Securities and Exchange Commission (SEC) and the Commodity Futures Trading Commission (CFTC) have significantly expanded. The level of funding of both the SEC and CFTC is a key challenge affecting their ability to deliver on their mandates in a way that provides confidence to markets and investors. The fragmented structure of equity markets remains a key challenge for the SEC.

Youth violence is a significant public health problem that affects thousands of young people each day, and in turn, their families, schools, and communities. Youth violence occurs when young people between the ages of 10 and 24 years intentionally use physical force or power to threaten or harm others. This illustrated technical package provides an overview about youth violence and evidence-based strategies for community leaders, families, school administrators, teachers, law enforcement, and state leaders to utilize as methods for youth violence prevention. Some example strategies include: Preschool enrichment with family engagement and parent education Mentoring/After School programs Hospital community partnership programs Youth volunteer opportunities While individual skills are important and research has demonstrated the preventive effects of many youth skill development programs, approaches addressing relationships with parents, peers, and other caring adults as well as approaches that influence school and community environments are equally important to have the greatest public health impact. This proceedings contains 89 papers from 25 countries and regions, including 14 keynote lectures and 17 invited lectures, presented at the Third International Conference on Geotechnical Engineering for Disaster Mitigation and Rehabilitation (3ICGEDMAR 2011) together with the Fifth International Conference on Geotechnical & Highway Engineering (5ICGHE), which was held in Semarang, Indonesia, from 18 to 20 May 2011. This is the third conference in the GEDMAR conference series. The first was held in Singapore from 12 to 13 December 2005 and the second in Nanjing, China, from 30 May to 2 June 2008. The proceedings is divided into three sections: keynote papers, invited papers and conference papers under which there are six sub-sections: Case Studies on Recent Disasters; Soil Behaviours and Mechanisms for Hazard Analysis; Disaster Mitigation and Rehabilitation Techniques; Risk Analysis and Geohazard Assessment; Innovation Foundations for Rail, Highway, and Embankments; and Slope Failures and Remedial Measures. The conference is held under the auspices of the International Society for Soil Mechanics and Geotechnical Engineering (ISSMGE) Technical Committee TC-303: Coastal and River Disaster Mitigation and Rehabilitation, TC-203: Earthquake Geotechnical Engineering and Associated Problems, TC-302: Forensic Geotechnical Engineering, TC-304: Engineering Practice of Risk Assessment and Management, TC-213: Geotechnics of Soil Erosion, TC-202: Transportation Geotechnics, TC-211: Ground Improvement, Southeast Asian Geotechnical Society (SEAGS), Association of Geotechnical Societies in Southeast Asia (AGSSEA), and Road Engineering Association of Asia & Australasia (REAAA).

Shifting faculty roles in a changing landscape Ernest L. Boyer's landmark book Scholarship Reconsidered: Priorities of the Professoriate challenged the publish-or-perish status quo that dominated the academic landscape for generations. His powerful and enduring argument for a new approach to faculty roles and rewards continues to play a significant part of the national conversation on scholarship in the academy. Though steeped in tradition, the role of faculty in the academic world has shifted significantly in recent decades. The rise of the non-tenure-track class of professors is well documented. If the historic rule of promotion and tenure is waning, what role can scholarship play in a fragmented, unbundled academy? Boyer offers a still much-needed approach. He calls for a broadened view of scholarship, audaciously refocusing its gaze from the tenure file and to a wider community. This expanded edition offers, in addition to the original text, a critical introduction that explores the impact of Boyer's views, a call to action for applying Boyer's message to the changing nature of faculty work, and a discussion guide to help readers start a new conversation about how Scholarship Reconsidered applies today.
