# **Dow Corning Mb50 321 Masterbatch Engpolymer**

Yeah, reviewing a books **dow corning mb50 321 masterbatch engpolymer** could mount up your near associates listings. This is just one of the solutions for you to be successful. As understood, ability does not suggest that you have astonishing points.

Comprehending as well as harmony even more than other will pay for each success. neighboring to, the pronouncement as capably as insight of this dow corning mb50 321 masterbatch engpolymer can be taken as well as picked to act.

## *Dow Corning Mb50 321 Masterbatch Engpolymer*

The DOW CORNING MB Series Masterbatches address these problems by supplying a high concentration of an ultra-high molecular weight (UHMW) siloxane as a dispersion in a dry pellet form in a variety of thermoplastics. The functionalized siloxane has unique advantages over standard polydimethylsiloxane (PDMS).

For enhanced anti-scratch performance in glass fiber-reinforced PA compounds, Dow Corning®MB50-011 Masterbatch is the material of choice. At loadings of 1.5-2.0 wt%, this masterbatch delivers improved surface properties and resistance to scratching. Dow Corning®MB50-011 Masterbatch also provides some COF reduction benefits, more so in neat PA.
