A transmission is a machine in a power transmission system, which provides controlled application of power. Often the term 5-speed transmission refers simply to the gearbox, that uses gears and gear trains to provide speed and torque conversions from a rotating power source to another device.. In British English, the term transmission refers to the whole drivetrain, including clutch, gearbox ...

Power Transmission (mechanics) - Wikipedia

Power transmission is defined as the movement of electrical energy from a generating site like power plant. Power transmission and distribution conductors are used for all transmission and distribution purposes. They are classified into various types including AAC (All Aluminum Conductor), and ASCR (Aluminum conductor, steel reinforced).
