Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

Is it possible? Fusible appliqué that's soft and drapery--and easy? Yes it is, and Pat Sloan shows you how. An extremely popular teacher and designer with a huge online radio show following, Pat shares her fusible techniques for machine-stitched quilts that are as delightful to touch as they are pleasing to the eye. You'll love what you're about to create! Projects range from wall hangings to banners to bed quilts, all with Pat's fresh and cheery style Gain confidence and get all your questions answered--Pat shares loads of tips throughout Own the first in a series of "Teach Me" books from one of the world's best quilting coaches

A beautiful book that not only helps families develop traditions based on the significance of Thanksgiving, but also builds a foundation of gratefulness in their lives.

This important book focuses on the role of human factors in the design and use of automobiles. It should review current knowledge of human characteristics as related to passenger car design and thus serve as a basis for new car design and design evaluation. Comprehensive and accessible, the book is organized around the following themes: human capabilities and limitations in car design - anthropometry, biomechanics, human vision, motor skills, and cognition; the physical aspects of car design - occupant packaging, entry and egress, seating, luggage loading, occupant protection, thermal environment; informational aspects of design - displays and controls, HUDS, icons, warnings, vehicle lighting and sounds; and special topics such as driving performance models, driver workload, older drivers, and computer-aided ergonomic design.; It is Aimed At Automotive Designers, Government Agencies Concerned With Car passenger transport issues and the ergonomics research community.

Grace Before Dying tells the emotional story of an extraordinary breakthrough in humanity that has helped to transform one of the most dangerous maximum security prisons in the US, the Louisiana State Penitentiary at Angola, into one of the least violent. Award-winning photographer Lori Waselchuk not only shows a culture of caring and compassion that challenges stereotypes of the incarcerated, but also provides an intimate and personal perspective on what long-term and life sentences signify from those inside. Includes an essay by prominent historian Lawrence N. Powell.

Let your quilting creativity soar with these magical machine techniques! Are you using your sewing machine to its fullest creative capacity? Do you know what each foot can do? Expand your repertoire with machine techniques, embellishment, surface design, and thread painting skill, thanks to your sewing machine. Nine highly qualified, experienced sewing machine educators have developed 13 delightful projects to show you how to make the most of your machine's technical possibilities. From pillows to bed scarves, from wallhangings to table runners, any quilt will benefit when its creator uses these techniques.

According to the great mathematician Paul Erdős, God maintains perfect mathematical proofs in The Book. This book presents the authors

candidates for such "perfect proofs," those which contain brilliant ideas, clever connections, and wonderful observations, bringing new insight and surprising perspectives to problems from number theory, geometry, analysis, combinatorics, and graph theory. As a result, this book will be fun reading for anyone with an interest in mathematics.

A dizzying trip through the mind(s) of the provocative and influential thinker Nick Land. During the 1990s British philosopher Nick Land's unique work, variously described as "rabid nihilism," "mad black deleuzianism," and "cybergothic," developed perhaps the only rigorous and culturally-engaged escape route out of the malaise of "continental philosophy" —a route that was implacably blocked by the academy. However, Land's work has continued to exert an influence, both through the British "speculative realist" philosophers who studied with him, and through the many cultural producers—writers, artists, musicians, filmmakers—who have been invigorated by his uncompromising and abrasive philosophical vision. Beginning with Land's early radical rereadings of Heidegger, Nietzsche, Kant and Bataille, the volume collects together the papers, talks and articles of the mid-90s—long the subject of rumour and vague legend (including some work which has never previously appeared in print)—in which Land developed his futuristic theory-fiction of cybercapitalism gone amok; and ends with his enigmatic later writings in which Ballardian fictions, poetics, cryptography, anthropology, grammatology and the occult are smeared into unrecognisable hybrids. Fanged Noumena gives a dizzying perspective on the entire trajectory of this provocative and influential thinker's work, and has introduced his unique voice to a new generation of readers.
