More recently, expert raters have been used to evaluate creative work, as outlined in the Consensual Assessment Technique. Peers, teachers, and parents have also been asked to assess a child's creativity, and self-ratings can be used as well. Finally, we provide a rationale for including creativity as part of a battery of assessments.

The aim of this tutorial is two fold: first, to provide an understanding of the nature of creativity based on research and practice; and second, to present an evaluation approach based on a matrix consisting of the three dimensions of how audiences respond, how we assess the creative works themselves and the expertise and skills of those who make those works.

Understanding and Evaluating Creativity

Dr Julian ' s system costs £45 for low intensity IAPT, £60 for high intensity support and £100 per session for secondary care clinical psychology support. This represents a potential cost saving for the NHS of £296 million at a weighted average, but more realistically £29 million if 10% of treatments were undertaken using Dr Julian.

1.How to overcome the mental blocks that prevent creativity. 2.How to be creative, even if it's not natural for you. 3.How to make time for creative work if you're busy. 4.How the world's greatest artists approach the task of creating. 5.How to make creating a consistent habit. 6.Why smart people should create things.

MASTERING CREATIVITY, 1st Edition - James Clear

A multi-dimensional model of creativity is introduced that provides a holistic framework for evaluating the actors and elements in creativity. The approach is informed by studies arising from practice-based research, a form of research adopted by creative practitioners for whom the artifact, for example an artwork, is a central concern.
