Fanuc Macro Variables: Note that these ranges may vary across controllers and especially for non-Fanuc controllers! Mach3 has 10,320 variables available, from #0 to #10320. There's not quite the variety found in Fanuc, but still, plenty of system variables are accessible so you can get at things like work offsets.

The Macro Executor function can convert a Custom Macro program created by the machine tool builder to an executable macro program, load the executable macro program (P-CODE macro) into F-ROM (CNC Flash Memory), and execute it. The function which converts a Custom Macro program to an Executable Macro program is called the Macro Compiler.

Fanuc macro edit on 16/18/21 & 16i/18i/21i-Parameter 3202 (NE9 will be above the proper bit #) (6079-6089 can be assigned an m-code or G code to call up the sub programs) (Parameter 6080=program #9020, 6081=9021, 6082=9022 ETC.) Mitsubishi Macro Edit 9000 programs change par.1121 to 0, and check 1122 should be 0 to display them.

*Fanuc Macro Program examples and programming*

Variable General workpiece program appoints G code and ship distance with numerical value directly; for example, GO1 and X100.0. When user macro is used, numerical value can be appointed directly or by variable. When variable is used, variable value can be changed by program or operation in MDI panel.

Well first check parameter 6080 thru 6089 Those specify what M code calls O9020 thru O9029 If one of those is not set to 6 then it is not expecting a macro. Also if there is one, change it back to 0 and it will no longer need a macro, but you will have to program what would be in the macro in your normal program instead.

Sir i understood the formula of the macro you given ,but the problem we are facing is to avoid the idle passes.In our component we need face serration having the step diameter from 250MM minor diameter and 400mm major diameter, but in macro starting diameter is step over/4 so we need to change the starting diameter to our component minor diameter. 06-16-2011, 06:25 PM #32. samu.
