Meant to aid State & local emergency managers in their efforts to develop & maintain a viable all-hazard emergency operations plan. This guide clarifies the preparedness, response, & short-term recovery planning elements that warrant inclusion in emergency operations plans. It offers the best judgment & recommendations on how to deal with the entire planning process -- from forming a planning team to writing the plan. Specific topics of discussion include: preliminary considerations, the planning process, emergency operations plan format, basic plan content, functional annex content, hazard-unique planning, & linking Federal & State operations.

"This course is for emergency managers and related professionals working with all types of volunteers and coordinating with voluntary agencies. [It] provides procedures and tools for building and working with voluntary organizations."--Page 4 of cover.

Hospital emergency department personnel face many risks and difficult tasks when dealing with patients involved in hazardous materials incidents. Therefore, it is essential that all personnel who come in contact with patients have a general awareness of the issues and concerns in dealing with hazardous materials incidents. This course is designed to prepare hospital personnel to analyze hazardous materials situations, take the necessary steps to assure medical provider safety, and identify appropriate resources for decontamination and medical care. However, additional training is required in order to diagnose and treat patients who have been involved in hazardous materials incidents. This course alone does not fulfill all of OSHA's requirements for hazardous materials training at the awareness level. This self-study course is a prerequisite for the Hospital Emergency Department Management of Hazardous Material Accidents (HMA) Parts One and Two classroom courses. This course will provide you with a general understanding of the terms and concepts related to hazardous materials and radiation. It also covers some basic principles regarding hospital personnel's response to hazardous materials incidents. This course, An Orientation to Hazardous Materials for Medical Personnel, contains five units, a final examination, and several appendices including a glossary. Words in boldface are defined in the Glossary.
