Success as a day trader will only come to 10 percent of those who try. It's important to understand why most traders fail so that you can avoid those mistakes. The day traders who lose money in the market are losing because of a failure to either choose the right stocks, manage risk, and find proper entries or follow the rules of a proven strategy. In this book, I will teach you trading techniques that I personally use to profit from the market. Before diving into the trading strategies, we will first build your foundation for success as a trader by discussing the two most important skills you can possess. I like to say that a day trader is two things: a hunter of volatility and a manager of risk. I'll explain how to find predictable volatility and how to manage your risk so you can make money and be right only 50 percent of the time. We turn the tables by putting the odds for success in your favor. By picking up this book, you show dedication to improve your trading. This is one of the most fascinating books that was ever written about trading because it is written by over thirty expert traders. These traders have many years of experience and they have learned how to turn technical analysis into profits in the markets. This is extremely difficult to do and if you have ever tried to trade the markets with technical analysis you would know what I mean. These writers have some of the best trading strategies they use and have the conviction and the discipline to act assertively and pull the buy or sell trigger regardless of pressures they have against them. They have presented these strategies at the Traders World Online Expo #14 in video presentations and in this book. What sets these traders apart from other traders? Many think that beating the markets has something to do with discovering and using some secret formula. The traders in this book have the right attitude and many employ a combination of fundamental analysis, technical analysis principles and formulas in their best trading strategies. The purpose of this book is to present to you the best trading strategies of these traders so that you might be able to select those that fit you best and then implement them into your own trading. I wish to express my appreciation to all the writers in this book who made the book possible. They have spent many hours of their time and hard work in writing their section of the book and the putting together their video presentation for the online expo.
