One thing all control valve buyers have in common is a desire to know as much as possible about their prospective purchase and the company that manufactures it. Fisher valve operations started in 1880 in Marshalltown, Iowa, United States. Since then, the company has grown to more than 8,000 people worldwide. Emerson is the largest control valve

~~The Condensed Handbook of Measurement and Control ...~~

A control valve is a valve used to control fluid flow by varying the size of the flow passage as directed by a signal from a controller. This enables the direct control of flow rate and the consequential control of process quantities such as pressure, temperature, and liquid level.. In automatic control terminology, a control valve is termed a "final control element".
