Raise and support the hood. With the engine turned off, locate the metal air conditioning line, which runs sideways along the very back of the Expedition's engine bay. There is a service port on top of the tube covered by a black plastic cap. Remove this cap. Screw the hose of a R-134a recharge system onto the service port.

Recharging the freon in your AC system is an inexpensive and easy first step to restoring the cooling capacity of your A/C system. Most refrigerants include a leak sealer that will seal small leaks in addition to filling the R134a refrigerant. The A/C system in your Expedition consists of a compressor that is belt-driven, an evaporator and freon.

**How to Add Refrigerant to a 1997-2002 Ford Expedition**...

As your 2000 Ford Expedition ages, the air conditioning unit will gradually lose its ability to cool the cabin of the vehicle. This is most often because the air conditioner unit needs to be recharged with refrigerant. The refrigerant cools the air that the blower forces into the vehicle. While a repair shop can recharge the air conditioner unit, you can do it much more cheaply yourself.

**How to Add Refrigerant to the AC on a 2000 Ford Expedition**...

Install air conditioning manifold gauge set. Determine if the air conditioning system charge is low. Add the correct refrigerant to top off the air conditioning system. Install thermometer in vents to monitor vent temperatures. Check system for leaks. Check for proper operation of AC system.
