Isa 101 And Hmi Workshop Yokogawa Users Conference

As it pertains to the managed lifecycle of a HMI, the ISA 101 committee suggests a philosophy that provides “ a foundation of concepts ” that lets new developers and users understand devices better. The ISA asserts if the person understands the what, why and how of a certain device, that person will in turn create and maintain an effective HMI.

Implementing ISA101

The ISA 101 standard emphasizes consistency and recommends developing a style guide before even attempting to create the first graphic display. The style guide should contain detailed guidelines and be used as the roadmap for creating and maintaining your HMI. Consistency is key to creating an intuitive and predictable interface for the operators.
