learn scripting by immersion. This edition builds on the earlier edition with substantial new content for scripting enhanced JMP features, such as Graph Builder, new query methods, and enriched display box functionality. A new chapter is dedicated to creating applications with the Add-In Builder and Application Builder. The “Know Your Tools” topic has been expanded, including a section on how to use the JMP Debugger. The book begins with an introduction that is intended for the JSL novice and quickly moves into the building blocks of JSL, which include input and output, working with data tables, script-writing essentials, and JMP data structures. The next chapters provide the foundation for building an application and focus on creating reports, communicating with users, customizing displays, and writing flexible scripts. The final chapters include building and

Jump into JMP Scripting, by Wendy Murphrey and Rosemary Lucas, contains the essentials for getting started with the JMP Scripting Language (JSL). The first part of the book explains JSL topics in an easy-to-understand style based on the authors' extensive experience. Each topic includes step-by-step instructions and plenty of code examples. The second part of the book is a rich source of example scripts showing you how to perform specific tasks in JSL. Using a unique question-and-answer format, each example answers a question with a script sample. In addition, many examples include a discussion section that explains functions in detail or provides additional references. Taken together, these two parts give you
