version is available. Search for ISBN 9781680922929. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

The bookkeeper needs a comprehensive knowledge of the practical aspects of accounting. This means understanding how to issue billings, process cash receipts, calculate depreciation, construct a chart of accounts, value inventory, pay employees and suppliers, file tax returns, and produce financial statements. The Bookkeeping Guidebook covers all of these topics and more with dozens of examples, as well as forms, templates, and references to the author's popular Accounting Best Practices podcast.

Explains how to use QuickBooks to set-up and manage bookkeeping systems, track invoices, pay bills, manage payroll, generate reports, and determine job costs.

For every action there is an equal and opposite reaction. But when it comes to human emotions, the reaction is never equal. No one understands this lesson better than the partners at the prestigious
