The building of Henry Flagler's Florida East Coast Railway extension over water to Key West from 1905 to 1916 was a triumph of engineering and logistics. The Keys were remote and with little means of communication. The massive amounts of materials had to be moved with steam power. This book tells the story of the planners and their plan and its execution. It has 250 old photos, most of which have never been published before.

This collection of postcards captures a trip along that magical ribbon of road from the Florida mainland to the "Southernmost City" of Key West and makes for an unforgettable journey.

This title is part of a new series of colourful guides to countries of the Caribbean and adjacent areas. The books are packed with practical information to help the visitor get the most out of their stay. Florida is one of the world's top tourist attractions and this invaluable guide to the Florida Keys describes the region from the mainland down to Key West. The author lives in Florida. Today, on the Keys between Key West and the mainland, some forty thousand residents and thousands of visitors fish, swim, sail and dive into the crystal clear waters off a tropical reef; relax in the sun and cooling trade wind breezes; and sleep in the air-conditioned comfort of their homes and hotel rooms. On these same islands, as short a time as eighty years ago, fewer than three hundred inhabitants tried to eke out a living without benefit of electricity, running water, radios, or telephones. The stories of these hard pioneers and their predecessors, as far back as the Native Americans who lived on the Keys at least one thousand years ago, are told, many for the first time, in this book.

In 1934, hundreds of jobless World War I veterans were sent to the remote Florida Keys to build a highway from Miami to Key
West. The Roosevelt Administration was making a genuine effort to help these down-and-out vets, many of whom suffered
from what is known today as post-traumatic stress disorder. But the attempt to help them turned into a tragedy. The
supervisors in charge of the veterans misunderstood the danger posed by hurricanes in the low-lying Florida Keys. In late
August 1935, a small, stealthy tropical storm crossed the Bahamas, causing little damage. When it entered the Straits of
Florida, however, it exploded into one of the most powerful hurricanes on record. But US Weather Bureau forecasters could
only guess at its exact position, and their calculations were well off the mark. The hurricane that struck the Upper Florida
Keys on the evening of September 2, 1935 is still the most powerful hurricane to make landfall in the US. Supervisors waited
too long to call for an evacuation train from Miami to move the vets out of harm's way. The train was slammed by the storm
surge soon after it reached Islamorada. Only the 160-ton locomotive was left upright on the tracks. About 400 veterans were
left unprotected in flimsy work camps. Around 260 of them were killed. This is their story, with newly discovered photos and
stories of some of the heroes of the Labor Day 1935 calamity.

Biscayne National Park protects the larger portion of south Florida's Biscayne Bay, a uniquely tropical lagoon harboring
crocodiles, manatees, dolphins, and Caribbean fish. Tropical trees cover its islands, while the world's fourth-longest coral reef
sits offshore. Native Americans lived here thousands of years ago; the Spanish held it for 200 years. Hundreds of ships
foundered on the reef, fueling a lucrative wrecking industry. In the late 1800s, hardy homesteaders created an agricultural and
fishing community. In the 1920s and 1930s, it became a playground for the newly rich and famous. Bracketed by Miami and
Key Biscayne to the north and Key Largo to the south, the nearby population eventually grew to over 2.5 million residents and
over 14 million annual visitors. To protect these unique natural and historical resources and to assure its enjoyment by future
generations, a half century ago, the federal government created Biscayne National Monument, which later became Biscayne
National Park.
