How and why does Denmark have one of the richest, most equal, and happiest societies in the world today? Historians have often pointed to developments from the late nineteenth century, when small peasant farmers worked together through

Online Library Limdep 10 Econometric Modeling

agricultural cooperatives, whose exports of butter and bacon rapidly gained a strong foothold on the British market. This book presents a radical retelling of this story, placing (largely German-speaking) landed elites—rather than the Danish peasantry—at center stage. After acquiring estates in Denmark, these elites imported and

adapted new practices from outside the kingdom, thus embarking on an ambitious program of agricultural reform and sparking a chain of events that eventually led to the emergence of Denmark's famous peasant cooperatives in 1882. A Land of Milk and Butter presents a new interpretation of the origin of these

Cooperatives with striking implications for developing countries today.

This paper analyses how the relationship between decent rural employment and agricultural productivity vary across production systems. The focus is on sub-Saharan Africa, taking Ethiopia and

Online Library Limdep 10 Econometric Modeling

Tanzania as case studies. A latent class stochastic frontier approach is applied to identify different production systems and technologies for a sample of farms in the two countries. Subsequently, we estimate the efficiency of production for these systems and investigate in how far decent rural employment indicators explain
