Long division - BBC

Long Multiplication and Grid Method The 2 multiplication methods we will see are the long multiplication (column) method and the grid method. The grid method is taught by many schools in the UK but there are many that prefer long multiplication, so we will look at both.  
Method 1: Long Multiplication (Column) Method

Long Multiplication | Grid Method | Maths Made Easy

Long multiplication (or column multiplication) is a written method of multiplying numbers (usually a two- or three-digit number by another

## Read PDF Long Multiplication Bbc

large number). It is usually used in Year 5 and Year 6 once children have got the hang of using the grid method.

Long multiplication explained for primary-school parents ...

Long Multiplication is a special method for multiplying larger numbers. It is a way to multiply numbers larger than 10 that only needs your knowledge of the ten times Multiplication Table. Let us say we want to multiply  $612 \times 24$

Long Multiplication - MATH

Whereas, long multiplication involves the multiplication of a 2, 3 or 4 digit number by a 2 digit number. The difference in calculation styles means that, in the latter's case, larger numbers can be broken down into more digestible chunks, making it easier to find a numerical solution.
