2 COMPONENT PARTS AND THEIR INSTALLATION 2.1 PRESSURE REDUCER The pressure reducer (image 1) vaporize the LPG through the engine cooling circuit and it also reduces the gas pressure in order to satisfy the right working process. The two palstic LPG water connection allows to connect the reducer to the engine cooling circuit.

Xtratech™ has a single coil design with 142% wider waterways* to
prevent the risk of debris blockage, and an overall improved water
flow. With this beast at its heart, the E-Combi ONE is powerful, but
also extremely smart. Its 1:7 modulation ratio means it can adapt to
provide the desired heating and hot water, while simultaneously
keeping fuel bills low.
