Climate change presents a large, complex and seemingly intractable set of problems that are unprecedented in their scope and severity. Given that climate governance is generated and experienced internationally, effective global governance is imperative; yet current modes of governance have failed to deliver. Hayley Stevenson and John Dryzek argue that effective collective action depends crucially on questions of democratic legitimacy. Spanning topics of multilateral diplomacy, networked governance, representation, accountability, protest and participation, this book charts the failures and successes of global climate governance to offer fresh proposals for a deliberative system which would enable meaningful communication, inclusion of all affected interests, accountability and effectiveness in dealing with climate change; one of the most vexing issues of our time.

The exploding global consumption of meat is implicated in momentous but greatly underappreciated problems, and industrial livestock production is the driving force behind soaring demand. Following his previous ground-breaking book *The Global Food Economy*, Tony Weis explains clearly why the growth and industrialization of livestock production is a central part of the accelerating biophysical contradictions of industrial capitalist agriculture. *The Ecological Hoofprint* provides a rigorous and eye-opening way of understanding what this system means for the health of the planet, how it contributes to worsening human inequality, and how it constitutes a profound but invisible aspect of the violence of everyday life.

A biography of one of nineteenth-century America's foremost poets and public intellectuals.

Laurie invites you to join her class of twenty-one second graders as they visit a small stream in the woods behind a suburban elementary school, and she shares her reflections on class discussions, activities, and learning experiences. From setting a tone of inquiry-based thinking in the classroom to suggesting specific units of study for reading, writing, and science, Laurie guides teachers step-by-step through the basics of how to integrate the skills acquired through nature study into every subject. You will also discover all the ways this purposeful work nurtures "green" citizens who grow up determined to value and protect the natural environment.

In the early twentieth century, Irene and Val build a life for themselves in Wideland while also allowing neighbors Bertha and Joseph to live on their land, and the two families cope with changing times and fortunes.

It's Thanksgiving break at exclusive Waverly Academy, and everybody's feeling thankful . . . for the long weekend. New BFFs Jenny Humphrey and Tinsley Carmichael are determined to snap their glum but still uberstylish roomie Callie Vernon out of her funk-it's been weeks since her boyfriend Easy Walsh was kicked out of school, and they're sick of her moping. The plan: head to NYC for some R & R! And some SS (serious shopping). But the girls quickly discover that a quiet holiday is not in store for them. A cozy Thanksgiving dinner turns into a three-day party with a few of their classmates-and some irresistible mystery guests. Jenny meets Mr. Right but is determined not to fall in love for the fourth time this fall. Tinsley has her own holiday mission: to win back adorable freshman Julian McCafferty. And Callie is holding out for Easy . . . which is hard to do with a cute college boy following her around. Brett Messerschmidt is missing in action-forced to spend Thanksgiving in her family's tacky Jersey McMansion. But drama's on the menu at the dinner table. And maybe love too. Forget turkey and stuffing. When you're an It Girl, a holiday is just another excuse to break out the bubbly.

This book explores the innovations and advances in terrorist tactics and technologies to help fill the gap in the contemporary terrorism literature by developing an empirical theory of terrorist innovation. The key question concerns the global historical trends in terrorist innovation, as well as the critical factors responsible for the differences in practices among terrorist organizations. The first part of the book provides an overview of the tactics and technology used by terrorists in the last century and identifies the key trends for the future. The second part compares four differing terrorist organizations with the aim of identifying key factors in producing innovative tactics and weaponry. The volume provides a historical explanation of the trends in terrorist innovation and also has policy relevance, as the ability to identify signature characteristics of innovation-prone terrorist organizations is a critical element in predictive threat assessment. Understanding Terrorist Innovation will be of great interest to students of terrorism studies, security studies and political science in general.
