Modbus for Field Technicians Page 6 Because it is so commonly used, because it is so limited, because some vendors went to a lot of trouble and because some vendors hired bad programmers, Modbus, as simple as it seems, can offer lots of complications. Modbus was invented to transfer data as well as to program/configure PLC ' s.

programmable logic controllers. Modbus has become a de facto standard communication protocol and is now a commonly available means of connecting industrial electronic devices. Modbus is popular in industrial environments because it is openly published and royalty-free. It was developed for industrial applications, is relatively easy to deploy and maintain compared to other standards, and places few

Modbus - Wikipedia

In Modbus you need a data sheet to know what data is inside a field device. In BACnet you don't. You can go online and discover the devices on a network and then interrogate the devices so they report what data

A Modbus query is made up of the device (or broadcast) address, a function code that defines any requested action, data returned with the request, and an error-checking field. A Modbus response is comprised of fields that verify the requested action has been taken, data sent with the response, and an error-checking field. The slave device will create an error message as its response if it is unable to fulfill the request or if errors impacted the receipt of the message.
