The shifting demographic toward a "graying" population -- coupled with today's reality of managed care -- makes the need for high-quality, cost-effective psychiatric services within the nursing care setting more urgent than ever. As we increase the number of our years, it is also imperative that we enhance the quality of those years. The product of the American Psychiatric Association's (APA's) Council on Aging and its Committee on Long-Term Care and of the Elderly, the Manual of Nursing Home Practice for Psychiatrists stands out because it focuses on the "how" -- not the "why" -- of nursing home care. Of exceptional importance is its detailed discussion of the Minimum Data

health care," says Robert Pear of The New York Times. This major study by the Institute of Medicine examines virtually all aspects of for-profit health care in the United States, including the quality and availability of health care, the cost of medical care, access to financial capital, implications for education and research, and the fiduciary role of the physician. In addition to the report, the book contains 15 papers by experts in the field of for-profit health care covering a broad range of topics--from trends in the growth of major investor-owned hospital companies to the ethical issues in for-profit health care. "The report makes a lasting contribution to the health policy literature."--Journal of Health Politics, Policy and Law.
