Optional SATS Papers – Year four Maths. There are two sets of optional Maths papers available for children to use as practice papers. Because they are now a little adrift from the syllabus and the new format of KS2 tests they should not be used to mean anything definitive in terms of results. When these papers are used they should simply be seen as a good benchmark of progress.

KS1 Year 2 SATs Papers

2019 was the fourth year of 'new-style' Key Stage 2 SATs tests under the new national curriculum. To help prepare children for the 2019 KS2 SATs, children were able to download the 2016, 2017 and 2018 papers free of charge. Whilst not working to the same curriculum, KS2 SATs Papers from 2015 (and before) were still useful to aid preparation.

The ECIS International Schools Directory 2009/10* contains up-to-date facts on more than 800 schools worldwide and comprehensive details of over 570 of them which are ECIS members.

Thirty-something, out of work, separated from his wife and alienated from his autistic son, Barney retreats into the fantasy world of his past. He harks back to the do-or-dare days with his mates, Winkie, Pompus, Stubbs and Tony Football. Nearly twenty years later, rummaging in the attic, Barney unearths a priceless possession, one that reunites his old circle of friends. As the men get involved in the re-creation of their childhood game - this time with very grown-up stakes - jealousies, rivalries and enmities test their friendship to breaking-point and even threaten their lives. Now, everyone is willing to do or die for the little green man...except this time it's for keeps.

This indispensable textbook provides the underpinning knowledge to support all teaching assistants working towards Level 2 of the National Occupational Standards. This new edition is fully revised and extended to incorporate and respond to all new materials required to meet the 2007 standards. Taking into account current initiatives including Workforce Remodelling and the Every Child Matters agenda, the book can be used to support NVQs, or other Teaching Assistant awards at level 2, or can be used simply to supplement good practice. This accessible companion: actively engages the reader in activities, developing reflective practice while giving the theoretical background to school-based work gives insight and information about pupils’ individual needs helps teaching assistants develop curriculum-based skills to enable more effective classroom support emphasises that teaching assistants are team members, supporting the school and being supported by the school. Contributions from specialist advisers ensure that the ideas and techniques are up to date, relevant and the best practice. All phases of education are covered, from the early years to later secondary years, and references are made to sources of further information throughout the book. The Essential Guide for Competent Teaching Assistants is invaluable in supporting both study and everyday practice. It will also be useful to training providers, teachers and school managers supporting Teaching Assistants in their professional development.

www

This title highlights aspects of progression and continuity in the teaching of English across the Foundation and Primary years and encourages readers to develop an understanding of key principles and the confidence to apply these appropriately to their classroom practice.

The College Entrance Examination Board and the Educational Testing Service claim that the SAT helps colleges select students, helps college-bound students select appropriate institutions, and furthers equality of opportunity. But does it really? Drawing on three national surveys and on hundreds of studies conducted by colleges, the authors refute the justifications the College Board and the ETS give for requiring high school students to take the SAT. They show that the test neither helps colleges and universities improve their admissions decisions nor helps applicants choose schools at which they will be successful. They outline the adverse effect the SAT has on students from nonwhite and low-income backgrounds. They also question the ability of the College Board and the ETS to monitor themselves adequately. The authors do not, however, recommend abolishing either college admissions testing or the College Board and the ETS. Rather, they propose dropping the SAT and relying on such already available measures as students' high school coursework and grades, and they raise the possibility that new achievement tests that measure the mastery of high school courses could be developed to replace the SAT.

How does graduate admissions work? Who does the system work for, and who falls through its cracks? More people than ever seek graduate degrees, but little has been written about who gets in and why. Drawing on firsthand observations of admission committees and interviews with faculty in 10 top-ranked doctoral programs in the humanities, social sciences, and natural sciences, education professor Julie Posselt pulls back the curtain on a process usually conducted in secret. “Politicians, judges, journalists, parents and prospective students subject the admissions policies of undergraduate colleges and professional schools to considerable scrutiny, with much public debate over appropriate criteria. But the question of who gets into Ph.D. programs has by comparison escaped much discussion. That may change with the publication of Inside Graduate Admissions...While the departments reviewed in the book remain secret, the general process used by elite departments would now appear to be more open as a result of Posselt’s book.” —Scott Jaschik, Inside Higher Ed “Revealing...Provide[s] clear, consistent insights into what admissions committees look for.” —Beryl Lief Benderly, Science

Master times tables in just 10 minutes a day with the activities in this essential home-study workbook from Carol Vorderman. 10 Minutes a Day Times Tables is a homeschool learning resource that teaches kids time tables in bite-sized chunks. Children prefer to learn in short bursts, making this workbook from Carol Vorderman the perfect homeschool introduction to Maths. Games and tests make learning fun, leading to maximum results in just 10 minutes a day. This workbook includes lots of multiplication practice and many word problems that relate to real-life experiences. The parents' notes section gives the answers, explains common pitfalls, and gives guidance on how to avoid them. 10 Minutes a Day workbooks are the perfect at-home reinforcement for subjects learned in school and support the National Curriculum.

Alfie only feels comfortable when he’s drawing comics in the attic—but soon his safe haven will be off limits Alfie is perfectly content to spend his time drawing alone in the attic. Nobody bothers him, and he has his door sealed tight against interruption. Up under the roof, he illustrates amazing cartoon strips about heroes and space adventures, from “Super Caterpillar” to “Super Bird”—even though his own life is anything but exciting. One day, Alfie’s mom calls him from the attic to tell him his older brother Bubba will be moving home and will take over the attic as his own apartment. Suddenly Alfie’s private world is turned inside out, and he’ll need to find a new “home,” even if that means spending time around his weird, argumentative family. This ebook features an illustrated biography of Betsy Byars including rare images from the author’s personal collection.

Covers topics that kids learn about during their Year 6 Maths lessons at school. This title contains practice questions in a variety of styles. It is suitable for 10 to 11-year-olds.
