Jessica Strawser’s A Million Reasons Why is “a fascinating foray into the questions we are most afraid to ask” (Jodi Picoult, #1 New York Times bestselling author)—the story of two women who discover a bond between them that will change both their lives forever. When two strangers are linked by a mail-in DNA test, it’s an answered prayer—that is, for one half sister. For the other, it will dismantle everything she knows to be true. But as they step into the unfamiliar realm of sisterhood, the roles will reverse in ways no one could have foreseen. Caroline lives a full, happy life—thriving career, three feisty children, enviable marriage, and a close-knit extended family. She couldn’t have scripted it better. Except for one thing: She’s about to discover her fundamental beliefs about them all are wrong. Sela lives a life in shades of gray, suffering from irreversible kidney failure. Her marriage crumbled in the wake of her illness. Her beloved mother, always her closest friend, unexpectedly passed away. She refuses to be defined by her grief, but still, she worries what will happen to her two-year-old son if she doesn’t find a donor match in time. She’s the only one who knows Caroline is her half sister and may also be her best hope for a future. But Sela’s world isn’t as clear-cut as it appears—and one misstep could destroy it all. “A thrilling story of what happens when a long-held family secret comes to light...[Strawser] shows that no one is ever truly a villain or a hero, but instead, we are all a beautiful and messy mix of both.” - Associated Press review

Theatrical producer André Charlot brought Parisian revue to Great Britain in 1912 and dominated his field for 25 years. He greatly influenced American musical theater with Charlot’s London Revue in New York in 1924. He created the kind of intimate revue the world came to identify as British, and was known for discovering and nurturing some of the greatest personalities in the century’s theater, including Beatrice Lillie, Gertrude Lawrence, Jack Buchanan, and Noel Coward. This biography, researched from sources including his personal memoirs, covers Charlot’s life and career from his youth in Paris to his time in Edwardian and interwar London, concluding with his final years in Hollywood playing all-purpose Europeans in B-movies and his death in 1956. Two unpublished essays by André Charlot are included as appendices: “Beverly Hills, 1937” and “A Quiet Game of Bridge.” The work is illustrated with family photographs from all periods of Charlot’s life, production photographs from his revues, contemporary caricatures from Tatler Magazine, and production stills of Charlot as an actor from Hollywood films.

Data is fundamental to the modern world. From economic development, to healthcare, to education and public policy, we rely on numbers to allocate resources and make crucial decisions. But because so much data fails to take into account gender, because it treats men as the default and women as atypical, bias and discrimination are baked into our systems. And women pay tremendous costs for this bias, in time, money, and often with their lives. Celebrated feminist advocate Caroline Criado Perez investigates shocking root cause of gender inequality and research in Invisible Women†, diving into women’s lives at home, the workplace, the public square, the doctor’s office, and more. Built on hundreds of studies in the US, the UK, and around the world, and written with energy, wit, and sparkling intelligence, this is a groundbreaking, unforgettable exposé that will change the way you look at the world.

Welcome to the Human Body Theater, where your master of ceremonies is going to lead you through a theatrical revue of each and every biological system of the human body! Starting out as a skeleton, the MC puts on a new layer of her costume (her body) with each "act." By turns goofy and intensely informative, the Human Body Theater is always accessible and always entertaining. Maris Wicks is a biology nerd, and by the time you’ve read this book, you will be too! Harnessing her passion for science (and her background as a science educator for elementary and middle-school students), she has created a comics-format introduction to the human body that will make an expert of any reader -- young or old!
