So you love somebody madly and you have woven many dreams to be lived and fulfilled together. The person you love, as per the Indian society is not of your caste. What do you plan to do now? Run away... or die... and put an end to all the people; the concerned society at large from pointing you out further? How about turning entrepreneurs instead...??? Sneek peak into the lives of Ishika Singh and Siddhartha Roy, who met during the first year of their college life and accidently fell in love with each-other. Like all the other couples, they dreamt of being together forever... but will they be able to tackle the Indian society? To answer the questioning society and their families... they decided to write their own destinies, they decided to become entrepreneurs and build their own world. But will they be able to do it...??? Will their love last and prove to be strong enough to face all the criticism...??? Will they be able to fullfill their dreams of being together forever..?? To know the inside story, catch up with Ishika and Sid along with their miserable friends Kittu, Tina, Vishal and Dev who seemed to have taken birth on this planet to add to their misery. A novel based on friendship, love, lust, business and lots of drama...!!!

Websites are a central part of today ' s business world; however, with the vast amount of information that constantly changes and the frequency of required updates, this can come at a high cost to modern businesses. Web Data Mining and the Development of Knowledge-Based Decision Support Systems is a key reference source on decision support systems in view of end user accessibility and identifies methods for extraction and analysis of useful information from web documents. Featuring extensive coverage across a range of relevant perspectives and topics, such as semantic web, machine learning, and expert systems, this book is ideally designed for web developers, internet users, online application developers, researchers, and faculty.

This book surveys reliability, availability, maintainability and safety (RAMS) analyses of various engineering systems. It highlights their role throughout the lifecycle of engineering systems and explains how RAMS activities contribute to their efficient and economic design and operation. The book discusses a variety of examples and applications of RAMS analysis, including: • software products; • electrical and electronic engineering systems; • mechanical engineering systems; • nuclear power plants; • chemical and process plants and • railway systems. The wide-ranging nature of the applications discussed highlights the multidisciplinary nature of complex engineering

systems. The book provides a quick reference to the latest advances and terminology in various engineering fields, assisting students and researchers in the areas of reliability, availability, maintainability, and safety engineering.
