Understanding the ways in which people save for their retirement is an urgent issue. So much has changed in the last 10 to 15 years, especially in the area of the provision of pensions and retirement income. Around the world, greater and greater responsibility is being allocated to individuals while governments discount their contributions to social security and employers retreat from the provision of supplementary retirement

income. This book explores the behavioral revolution and its implications for understanding financial decision-making and saving for the future. Recognizing the profound implications of this research program, it goes beyond issues of risk aversion, framing, and decision-making to consider how social identity and the resources due to people by virtue of their place in society figure in savings behavior. It gives considerable attention to the context of the environment in which people make financial decisions, arguing that this allows a better understanding of the coexistence of sophistication and naivety apparent in patterns of retirement saving. Utilizing databases from the UK, the book provides an empirical foundation to its theoretical arguments, demonstrating how an integrated approach to individual financial decision-making is necessary if we are to address the apparent shortfall in many people's planning for the future. The book concludes by setting the agenda for the design, governance, and regulation of pension savings schemes consistent with delivering cost-effective solutions to pension adequacy. In these ways, it sets forth a strategy for rethinking individual behavior as well as the design of retirement income systems.

As individuals assume greater responsibility for retirement saving, the book analyses how people save and make financial decisions,

taking into account the behavioural revolution and the effect of society and context.--Résumé de l'éditeur.

This monograph explores the historical position of pensions law in the UK and the recent influences which have led to the introduction of Auto-Enrolment and subsequent reforms. Alternative models, such as the US and Australia, are also considered as well as the function of law in bringing about political changes. The question of saving for retirement is of national and international importance and many governments are wrestling with the issue of how to deal with the pension funding crisis. Consequently political policy has, in many cases, combined with behavioural science to inform new laws which have acted to shift the burden from the state into the private sector. Around the world responsibility is being moved onto individuals and employers as the state retreats from provision of state support in retirement; this book offers a sophisticated analysis of the role of legal intervention to facilitate this shift. The book explores the work of behavioural economics, its global influence on understanding financial decision-making and its application to legislation which seeks to influence consumer outcomes. Drawing on qualitative empirical research to explore the experience of implementation of Auto-Enrolment, this timely work considers the interaction with the work of behavioural

science to highlight the social costs of the new regulatory regime.

An intimate history of the people of the Parliamentary Press Gallery who covered Canadian history, and made some of their own.

Prominent economists present detailed analyses of the conditions that made Greece vulnerable to economic crisis and offer policy recommendations for comprehensive and radical change. More than eight years after the global financial crisis began, the economy of Greece shows little sign of recovery, and its position in the eurozone seems tenuous. Between 2008 and 2014, incomes in Greece shrank by more than 25 percent, homes lost more than a third of their value, and the unemployment rate reached 27 percent. Most articles on Greece in the media focus on the effects of austerity, repayment of its debt, and its future in the eurozone. In *Beyond Austerity: Reforming the Greek Economy*, leading Greek economists from institutions both within and outside Greece, take a broader and deeper view of the Greek crisis, examining the pathologies that made Greece vulnerable to the crisis and the implications for the entire eurozone. Each chapter takes on a specific policy area, examining it in terms of Greece's economic reality and offering possible directions for policy. The topics range from macroeconomic issues to markets and their regulation to

finance to the public sector. Individual chapters address the costs and benefits of participation in the eurozone, Greece's international competitiveness, taxation, pensions, the labor market, privatization, product markets, finance, education, healthcare, corruption, the justice system, and public administration. The contributors argue that Greek institutions require a deep overhaul rather than quick fixes to enable long-term growth and prosperity.

Population ageing is among the most important developments of our time. This book explores the profound challenges faced by an aging world. Leading experts from diverse disciplines describe the fundamental impact demographic aging has on pension systems, on the concepts of retirement and old age, and on the balance of generational justice.

This book presents the re-theorisation of travel and transformation. It explores the factors that influence the behaviours of a traveller, how these become entwined in experiences and how travel experiences continue on a traveller's return. It uses the notion of transformation to redevelop the temporal and spatial boundaries of physical travel, develop a model for unpacking transformation and to look at new methods in the exploration of travel research.

Research Handbook on EU Labour Law features contributions from leading scholars in the field. Part I addresses cross-cutting themes, such as the relationship between EU law and national law, the role of human rights in EU labour law, and the impact of austerity measures. In Part II, the contributors focus on topics in individual and collective labour law at EU level, including working time and job security. Finally, Part III offers a comprehensive overview of the EU's interventions in equality law.
