Security GSM Alarm System

A GSM home alarm system is a wireless home security product. The security alarm itself, as well as its

Download File PDF Security

motion sensors and door and window opening sensors, link up to a mobile network.

Basically, your GSM home security alarm will communicate with the wider GSM network using a SIM card. What are the advantages of GSM home alarm systems?

Connect the power cable to alarm panel and switch it ON, now the system is ON. When turn on the system, it will try to make communication with GSM, so you need to wait 20 seconds, before any operation.

Download File PDF Security

After 20 seconds, you can press "UP" "DOWN" icon to check the GSM level. If the LCD display "NO SIM CARD", that means the system is not inserted with valid SIM or can not detect the SIM card. If it shows signal level like "15 OK", that means the alarm system can communicate with GSM network. 2 ...
