Originally published in 1988, this book offers the first comprehensive and critical analysis of the privatisation of public housing in Britain. It outlines the historical background to the growth of public housing and the developing political debate surrounding its disposal. The main emphasis in the book, however, is on the ways in which privatisation in housing links to other key changes in British society. The long trend for British social housing to become a welfare housing sector is related to evidence of growing social polarisation and segregation. Within this overall context, the book explores the uneven spatial and social consequences of the policy.

This book offers a comprehensive and critical analysis of the privatisation of public housing in Britain. The main emphasis is on the ways in which privatisation in housing links to other key changes in British society.

Controlling a New Migration World explores the factors that drive recent migration control policies and, in turn, sheds light on the unintended consequences of policies for the new character of migration. This book asks how we can account for the immigration policies of liberal states. Is the recent linkage between migration and security a rhetorical invention of elites or a reflection of changing migrant profiles? Are states' control policies effectively containing or only redirecting unwanted migration flows? This increasingly relevant issue will be of great use to anyone working in comparative politics, sociology and studying ethnicity or international migration, as well as professionals working in the migrant/asylum and public law fields.

Originally published in 1984, Contradictions of the Welfare State is the first collection of Claus

Offe's essays to appear in a single volume in English. The political writings in this volume are primarily concerned with the origins of the present difficulties of welfare capitalist states, and he indicates why in the present period, these states are no longer capable of fully managing the socio-political problems and conflicts generated by late capitalist societies. Offe discusses the viability of New Right, corporatist and democratic socialist proposals for restructuring the welfare state. He also offers fresh and penetrating insights into a range of other subjects, including social movements, political parties, law, social policy, and labour markets.

"Welfare service systems all over Europe and beyond are under major transformations with new models of service delivery and management, austerity measures, requirements for cost-effectiveness, marketization, and the prioritization of services. This book studies these from the standpoint of women in vulnerable positions in society. The women whose experiences and encounters with the service system are heard include women in poverty, homeless women, women with substance use problems, women sentenced of crime, and refugees and asylum-seeking women. They encounter severe obstacles, face stigma, social inequalities and oppression in their everyday life. They would need special attention and support from the professionals and the service system. Instead, they easily fall in between complex systems, do not have their individual needs met or their specific life situations recognised. Drawing upon research and critical discussions from different countries, Finland, Canada, Israel, Slovenia, Spain and the UK, the book provides new empirical findings, critical insights, and a valuable resource for the academics and students in social work, social policy, sociology and gender studies, but also for policy makers and professionals in social and health care"--

Long-term care is an increasingly important issue in many contemporary welfare states around the globe given ageing populations. This ground-breaking book provides detailed case studies of 11 EU-member states' welfare regimes within Europe to show how welfare states organize, structures and deliver long-term care and whether there is a social investment perspective in the delivery of long-term care. This perspective is important because the effect of demographic transitions is often used as an argument for the existence of economic pressure on welfare states and a need for either direct retrenchment or attempts to reduce welfare state spending. The book's chapters will look specifically into how different welfare states have focussed on long-term care in recent years and what type of changes have taken place with regard to ageing populations and ambitions to curb increases in public sector spending in this area. They describe the development in long-term care for the elderly after the financial crisis and also discuss the boundaries between state and civil society in the different welfare states' approaches to the delivery of care.

Innovation is an oft-heard buzzword in both public and private sectors concerned with the organisation and delivery of services to vulnerable individuals. This thoughtful volume explores what innovation might actually involve in the context of contemporary human services. Highlighting both the importance and utility of innovation but also promoting a more reflective approach, the book distinguishes between innovation and improvement and discusses the relevant differences between private sector, public sector and non-profit organisations. It looks at how innovation is often as much a result of the power relations between the involved actors, and the structural context, as a result of popularly identified 'drivers' and 'barriers'. Including numerous case studies, the book illustrates and explains innovations in welfare services at different levels, looking at the macro level (innovations in social policy), the meso level (innovation at organisational level) and the micro-level (user-driven innovations). Arguing the innovation is nothing new in human services, the authors emphasise the importance of innovation being developed and supported by those working within those organisations. New and creative solutions to problems encountered in everyday work by front-line workers can be taken up to improve services provided and make a difference for the users, rather than change being externally imposed upon them by those without insider knowledge. Innovation in Social Welfare and Human Services is an important read for researchers and practitioners interested in the administration, leadership and organisation of social services.

Social Work and Social Welfare: An Invitation is a nationally recognized, best-selling text and unique website for US Introductory Social Work and Social Welfare courses. This book examines how and to what extent the European Employment Strategy and the Open Method of Coordination (OMC) on Social Protection and Social Inclusion have influenced national labour market and social welfare policies. Focusing on the implementation of the OMC in different national environments, this book examines how the proposals and targets of the OMC are interpreted and implemented within the context of existing national employment and welfare regimes. At a theoretical level and on the basis of national case studies, the book considers how OMC objectives, guidelines, targets, and recommendations may reshape the domestic institutional framework, how learning and participation of governmental bodies are organized across different hierarchical levels, and how non-state actors may be involved in the formulation and implementation of national reform plans. The authors conclude that the OMC has contributed significantly to both substantive and procedural reforms, in spite of the many

institutional barriers to Europeanization in this policy area. Featuring comparative case studies across a number of European states, this book will be of interest to students and scholars of sociology, political science, public policy, and international relations.

Offers an account of contemporary trends in education reform and public sector governance, focusing on the increasing role of business and philanthropy in education service delivery and education policy and the emergence of new forms of 'network' governance.
