Student research projects in calculus - B-OK
These student projects have been developed by the mathematics department of IUPUI for their introductory calculus sequence Integrated Calculus with Analytic Geometry I and II. Each project begins with a brief review of a topic that has been presented in lecture. The student is then guided through a Maple exploration of the topic. Projects are rated as either Basic or Honors.

Project Based Math 112, Fall 2001
A student desiring to work on a project on any of these areas should have successfully completed at least MATH 3030 and be proficient in LaTeX. Dr. Rachel Epstein's primary area of research interest is mathematical logic, and in particular, computability theory.

Projects | Georgia College & State University
Student Resources: Calculus Projects. Instructors in the mathematics department care deeply about student learning. Over the years, many instructors have made efforts, either individually or in groups, to enhance student engagement in our core courses, especially the calculus sequence. Below are links to more information about several initiatives that have focused on active, project-based, and inquiry-based learning in calculus.
