With this simulator of the local solar system, with data from the earth, the sun and the moon, you can know the exact position of the moon and the sun with respect to the earth for any date. On earth, the area where it is night is drawn in darker color. Current simulation date

Sun, Earth and Moon Position - 3D Simulator

The Earth's path around the Sun is called its orbit. It takes the Earth one year, or 365 1/4 days, to completely orbit the Sun. As the Earth orbits the Sun, the Moon orbits the Earth. The Moon's orbit lasts 27 1/2 days, but because the Earth keeps moving, it takes the Moon two extra days, 29 1/2, to come back to the same place in our sky.

500 - Best Sun & Moon Art Images in 2020 | moon art sun

If Earth and Sun and Moon isn't Midnight Oil's best effort, it's certainly close. The band still sticks to themes that are close to its heart -- the environment, native peoples, and other social causes -- but rarely has it managed to fashion an album full of songs that are as musically intoxicating as on this 1993 release.
