The Automotive Chassis Volume 1
Components Design. Giancarlo Genta, L.
Morello. The aim of the book is to be a
reference book in automotive technology,
as far as automotive chassis (i.e.
everything that is inside a vehicle except
the engine and the body) is concerned. The
book is a result of a decade of work
heavily sponsored by the FIAT group
(who supplied material, together with
other automotive companies, and
sponsored the work).

The present volume (The Automotive
Chassis – Volume 1: Component Design)
focuses on automotive chassis
components, such as:• the structure, which
is usually a ladder framework and supports
all the remaining components of the
vehicle;• the suspension for the
mechanical linkage of the wheels;• the
wheels and tires;• the steering system;•
the brake system; and• the transmission
system, used to apply engine torque to the
driving wheels.

The text is subdivided in two volumes. The first one deals with the automotive chassis components, such as:

- a structure, usually a ladder framework, able to carry all the remaining components of the vehicle;
- the suspensions for the mechanical linkage of wheels with the framework;
- the wheels and their tires;
- the steering system for changing wheel angles according to vehicle path;

Stephen Blake. On October 1, 1982, real-estate developer Stephen H. Blake bought the rights to the Avanti II. [citation needed] The state of Indiana guaranteed \$1.9 million in loans to Avanti, as part of the financial package offered Blake when he bought the company. Modifications were introduced to the car, which had remained unchanged since the production of the Avanti II model began in the ...
