This critical factor allows the reader to understand the flow of events and other factors influencing the actions of the key stakeholders, thereby facilitating the ethical decision-making process. brief learning exercises with focused summaries. The reader is challenged to analyze each case and compare the results with the preferred resolution proposed by the authors. Finally, at the end of the book, the reader has access to a list of ethics-relevant reading resources. These resources are divided into categorical domains that will assist with literature searches and further research into applied ethics. The authors trust that this book will serve as a preparatory experience for those psychologists studying for the Rehabilitation Psychology specialty board exam, as well as trainees and clinicians at all levels who desire an applied approach to utilizing the APA Ethics Code as an invaluable guide to everyday professional practice.
