the distinction of being both widely used in academia and in practice.

## DCF Model Training: 6 Steps to Building a DCF Model in

...

A DCF model is a specific type of financial model used to value a business. DCF stands for Discounted Cash Flow, so a DCF model is simply a forecast of a company's unlevered free cash flow discounted back to today's value, which is called the Net Present Value (NPV). This DCF model training guide will teach you the basics, step by step.

Summary Text This video opens with an explanation of the objective of a discounted cash flow ("DCF") model. In DCF analysis, essentially what you are doing is projecting the cash flows of a company, project or asset, and determining the value of those future cash flows today. DCF analysis is focused on the Time Value of Money.
